Discord bot specification
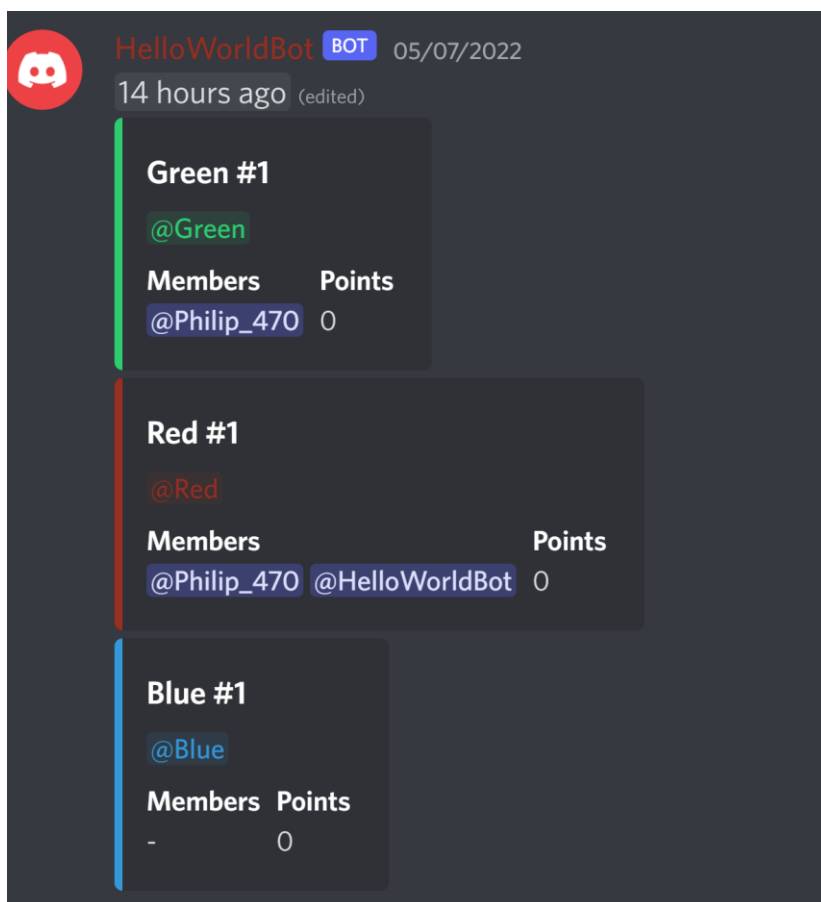

- All commands are admin only. Bot only uses most recent channel message it sent to update.
- "/reset". Sets all points to zero. If flag is set to true, attempts to edit an previous message from bot in channel. If no message can be found (or flag is set to false), a new message is sent. Only admins can call this.
- "/update" updates the message. Does the same as "/reset" but keeps the points score. If no message has been sent yet, nothing happens. This update command runs automatically once every hour.
- "/add {role}" adds one point to chosen role. If role is not a valid one OR no prior bot message exists, nothing happens. Only admins can call this.
- "/add {role} {points}. Adds specified points to specified role. If role is not a valid one OR no prior bot message exists OR points <= 0, nothing happens. Only admins can call this.
- "/sub {role}" subtracts one point from chosen role. If role is not a valid one OR no prior bot message exists, nothing happens. Only admins can call this.
- "/sub {role} {points}. Subtracts specified points from specified role. If role is not a valid one OR no prior bot message exists OR points <= 0, nothing happens. Only admins can call this.
- "/set {role} {points}. Sets number of points for selected role. If selected role is not valid, nothing happens. Only admins can call this.
